(b) the manner in which Government can solve the problem of diminishing farm lands due to increasing population; and

(c) the steps Government propose to take to solve the shrinkage of agricultural land and degradation of the lands/forests in the country?

THE MINISTER OF STATE IN THE MINISTRY OF AGRICULTURE (SHRI ARVIND NETAM): (a) In a recent paper on "Food Security in Asia", Dr. Mehboob Hussain, an Economist of International Rice Research Institute, Phillipines, Manila has stated that as the demand for food grows with the increase in population, many land scarce countries will find it difficult to sustain the guins they have made in achieving food security. He has also stated that rapid population growth is putting pressure on the supply of key crops including rice.

(b) and (c) Various steps/initiated to reduce shrinkage of agriculture land and increased production of foodgrains include:—

(i) Increasing productivity of foodgrains per unit area of land by increased use of inputs like improved seeds fertilisers etc.

(ii) Conjuctive use of surface and ground-water potential to increase the area under irrigation to facilitate crop intensification,

(iii) Use/Introduction of hybrid varieties of crops,

(iv) Use of Integrated Pest Management to avoid damage to crops.

(v) Conservation of forest/Agricultural land by discouraging its use for non-forest and non-agricultural activities like human settlements, industrial uses, etc.

(vi) Development of wastelands/degraded forest lands through tree plantation.

(vii) Cultivation of fuel and fodder trees through Agro-forestry and Farmforestry under Social forestry.

(viii) Treatment of alkaline and saline soils.

(ix) Stress on development of watershed and command area's.

(x) Discouraging shifting cultivation.

(xi) Adopting soil conservation measures especially in hilly areas.
